

Technical Data Sheet

CRAMOLIN® CLEANER Art. No.102

Product description

PRINTER is a mixture of carefully matched solvents ideal for the removal of color and toner residues from matrix-, ink- and laser-printers. It is also very effective in cleaning the printer paper entry mechanism and keeping free from paper dust. Tiresome problems with the entry of the paper are eliminated. PRINTER does not attack the commonly used materials and evaporates without leaving any residue.

Application

For the intensive cleaning of printing units of all kinds. For the removal of paper dust from the printer's paper entry rollers, improving the grip and the paper entry. Also suitable for conventional typewriters, calculating machines, plotters etc.

Please note

Spray thoroughly on parts to be treated. Ensure uniform wetting of these surfaces. Adjust quantity of PRINTER to degree of dirtiness. For spots of difficult access, use the attached extension tube. Spray at intervals, avoid continuous spraying.

Technical Data

Appearance:	clear, colorless liquid
Odor:	that of alcohol
Density at 25° C:	0,69[g/cm ³]
Flash point:	< 0 [° C]
Residue:	none
Material compatibility:	good
Evaporation:	quick and complete

Storage / Shelf Life

Shelf life is 2 years if stored correctly.
Package after emptying to be disposed via metal scrap.
